

Propeller Blades Bf-109 G-1 to G-6 & G-14 9-12087A type
For 1/32 Hasegawa and New Revell kits

32008

This set corrects shape of the propeller blades of early and mid versions of Hasegawa's 109. Although they fit to original plastic spinner, you can get the best results by using them along with our „BF-109 G/K Propeller Spinner” (D.O.C. 32001).

With minor modification of mounting pins will also fit to new Revell kit.

A little cleaning-up of edges is necessary. If use along with our spinner, do not remove seam line on mounting pins. They will help to get tight fit with hub. Use 5-minute epoxy for bonding blades with hub. It will left you enough time to adjust correct pitch angle.

No original kit parts were used during creation of pattern model.

Work like with usual resin parts:

Use dust mask to protect respiratory system. Wet sanding is recommended. Avoid contact resin dust with eyes and (prolonged) with skin. May cause irritation or sensitization. Disposable gloves and safety goggles are recommended.

Before painting degrease surface with Testors Plastic-Prep or pure benzene (petroleum ether).

Do not use paint thinner or gasoline. Do not use benzene to degreasing styrene plastic parts.

Prime with good plastic primer (Mr.Hobby: Mr. Resin Primer, Mr.Surfacer 1000), automotive plastic primer or good enamel paint.

Join parts with medium viscosity cyanoacrylate and 5-minute epoxy glue.

Always work in well ventilated area.

Take caution when handling with flammable materials.
